

[www.padoza.cz](http://www.padoza.cz)

PADOZA company was founded in 1991. Immediately it started to expand in the Czech market offering steel constructions assembly, metalworking including stainless steel materials, aluminium, copper, etc. The company grew and in 2007 was founded the PADOZA Ltd. (s.r.o.).

We focused initially on supplyin locksmith service for the construction companies. Since the late 90-ies we contributed for the construction of the cell-sites for the mobile operators. There was a high number of complex steel constructions and masts/towers. In 2006 we initiated the production of light steel halls for productive and stock purpose.

In 2008 we won different tenders for the supply of manufacturing machinery units for different companies in the rubber industry in Czech republic and abroads.

PADOZA company has two production units: Zlín – Kostelec and Fryšták (close to Zlín). There is a machining production at Kostelec. The main production is since 2010 concentrated in Fryšták. On a 2 000 m<sup>2</sup> surface, there are the production unit, store house, paint-shop and the head office of PADOZA company.

The production capacity of PADOZA company permits to process up to 3 tons of iron per day. We have a modern machinery, maintenance and manufacturing applications and cargo.

**PADOZA Ltd. (s.r.o.).**

PADOZA is a supplier of a variety of manufacturing and maintenance machinery for the rubber industry. We reflect our client's requirements on construction and function.

Thanks to our innovations, we successfully reduced the weight of the machinery by almost one third. This lightweight version has a positive effect on the ergonomics and safety at work. It also contributes to the reduction of the costs of production.

A new released product in our offer is the Gravity Feeder Unit including pallets for rubber mixtures.
